Pinnacle Series by Eagle Point Software

When efficiency matters

About the platform

Eagle Point Software's flagship e-learning and productivity platform, Pinnacle Series, offers a diverse array of on-demand learning content for AEC and Manufacturing professionals. Pinnacle Series is designed to help companies grow with thorough, efficient, and effective training with a platform designed specifically to help organizations build and upskill their workforce. Users have a wide variety of options to engage with content – they can search for individual workflows, documents, or videos, use personalized learning paths, or participate in live training events.

What they offer

Eagle Point's Pinnacle Series pairs with Autodesk Enterprise Business Agreement customers. Pinnacle Series provides organizations with a learning management solution that hosts expansive content libraries developed by industry experts to ensure efficient and productive teams. The solution also supports custom content creation. Users can engage with the content over the LMS or directly within Autodesk software via Pinnacle Series related learning plugin. Pinnacle Series also offers reporting to ensure the right content gets to the right users. Larger organizations also have access to a Customer Success Manager who will assist them throughout the lifetime of their Pinnacle Series subscription.

Highlighted features

Content type

Pinnacle Series boasts thousands of assets across courses, quizzes, documents, and videos, which are all supported with personalized learning paths and can be supplemented with customer content.

Integration options

Pinnacle Series' related learning plug-in can be leveraged directly in Autodesk software and recommends content based on user commands, while the KnowledgeSmart plug-in assigns personalized training based on user skill gaps and assessment results.

Customization

The platform can be designed and tailored by an assigned Customer Success Manager, and organizations can work with Eagle Point's expert resources to create custom content.

Expansive use and support

Pinnacle Series serves multiple ways of working:

- Content available for translation in over 90 different languages
- Multi-device support across desktop and mobile
- Download content for offline use and sync once back online

Pinnacle Series has become the leader in Autodesk eLearning with over

350,000

globally registered users.
