

# Unifying Knowledge, Process, and Technology with Pinnacle Series

## DRIVE TECHNOLOGY ADOPTION WITH PINNACLE SERIES

Delivering the highest quality work, reducing costs, and staying ahead of the competition are the core value propositions of new technologies. As advanced software programs become more integrated into modern workflows, staying on top of platform updates and process changes requires ongoing investment in employee training.

For businesses within the architecture, engineering, construction, and manufacturing (AEC & Manufacturing) industries, investments into top-tier software licenses are a necessary expense. However, for these organizations to see the best return on their investment, they need to know their workforce is using the technology effectively. It is just as essential that internal knowledge gained from process improvement is captured and shared with employees as they develop.

Pinnacle Series supports workers as they keep pace with emerging technologies. By creating a centralized knowledge hub, organizations can guarantee that everyone has equal access to core information. As businesses develop processes, Pinnacle Series ensures users learn the new way of doing things, and apply that learning within their workflows.

### CHALLENGES OF A FRACTURED KNOWLEDGE/PROCESS/TECHNOLOGY WORKSPACE

**Problem:** Key experience is lost as employees leave or retire.

**Solution:** Pinnacle Series gathers the shared wisdom of the workforce, transforming individual experience into collective knowledge.

**Problem:** Resources are scattered and managers are stretched thin.

**Solution:** With a training library developed by industry experts, Pinnacle Series transmits learning efficiently and through accessible channels.

**Problem:** New technologies emerge and cornerstone platforms update faster than your company can keep pace.

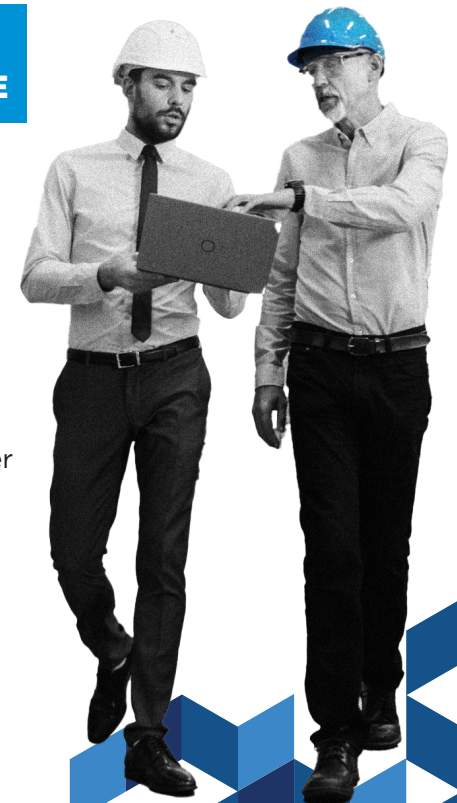

**Solution:** The content team at Pinnacle Series has been known to update training content faster than the software platforms themselves.

**Problem:** Workers import practices acquired at other firms, or simply try to solve problems their own way, leading to uneven work quality.

**Solution:** Pinnacle Series helps companies standardize the best practices of their firm, reducing errors and inconsistency.

**Problem:** Employees lose billable time as they search for answers.

**Solution:** With Pinnacle Series, continuous learning happens within the employee's natural workflow.

# KEY PINNACLE SERIES FEATURES

**LIBRARIES:** Create content libraries to centralize key resources, such as employee handbooks or other process documentation.

**KNOWLEDGE ASSESSMENT:** Pinpoint knowledge gaps within the workforce. Assess job candidates and expedite onboarding.

**CUSTOM CONTENT:** Edit courses to match internal standards.

**WORKFLOWS:** Align processes with in-the-moment work so that users can reference step-by-step instructions for complicated tasks.

**ASSIGNMENTS:** Manage enrollment by user role, set assignment due dates, and see training history.

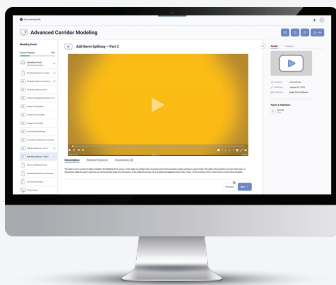

**PERSONALIZED LEARNING:** Support individual development with course assignments and learning paths tailored to fit the needs of each user.

## PINNACLE SERIES CONTENT LIBRARY

The Pinnacle Series content team monitors product and content releases at leading software providers and updates the training library to ensure instruction stays relevant.

## PINNACLE SERIES CONTENT LIBRARY

### Pinnacle Series provides the framework for a dynamic learning hub.

The process of acquiring new knowledge, integrating into business practices, and training the workforce so that they can internalize the new learning is a never-ending cycle. As business grows, that process only expands. Pinnacle Series offers a powerful, flexible framework that can grow and adapt with your organization to meet evolving needs—even ones that have yet to be identified.
