APPLIED LEARNING WITH PINNACLE SERIES

Where Training Meets Execution for AECO, Design, and Manufacturing

AECO and manufacturing organizations know the challenges all too well: generic training that wastes time, scattered knowledge that disappears with turnover, and projects slowed down by errors, rework, and uneven adoption of technology. The result? Delays, cost overruns, and lost productivity.

WHAT IS APPLIED LEARNING

Applied Learning is where training meets execution. Unlike traditional training that often feels disconnected from day-to-day responsibilities. Engineers, architects, designers, and builders don't just learn new concepts they learn how to apply them in the exact tools, projects, and workflows they use every day. This approach transforms training from an isolated activity into a performance driver that helps organizations achieve stronger project outcomes, greater workforce agility, and lasting business impact.

THE BUSINESS IMPACT

Applied Learning transforms training from a cost center into a competitive advantage:

Faster project
delivery with
fewer mistakes

Higher workforce
agility and
technology adoption

Stronger employee
engagement
and retention

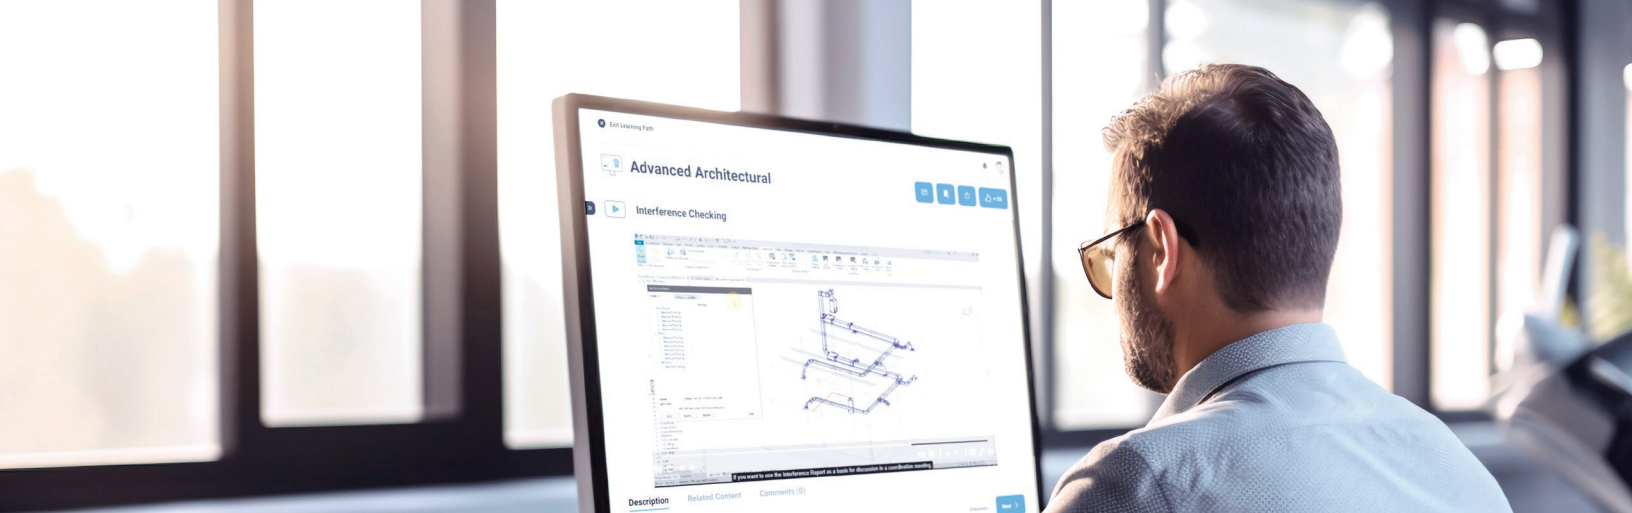

Improved profitability
through efficiency
and standardization

PINNACLE SERIES

WHY IT MATTERS

With Pinnacle Series, learning isn't a distraction - it's a catalyst. Teams build the right skills faster, adopt new tools more effectively, and apply knowledge in real time to the projects all in the flow of work. This reduces errors, drives efficiency, and ensures consistency across teams and locations.

HOW PINNACLE SERIES BRINGS APPLIED LEARNING TO LIFE

Pinnacle Series delivers training that's relevant, role-specific, and immediately actionable:

- **Personalized Learning Paths** powered by skill assessments ensure every team member gets the right training at the right time.
- **Learning in the Flow of Work** integrates knowledge directly inside of daily work, minimizing downtime.
- **Custom Workflows & Standards** let you embed your company's best practices and compliance requirements, so your people learn your way of working.
- **Multi-Format Content** - videos, workflows, learning paths, and documents keep training accessible whether you're on-site, in the office, or on a deadline.
- **Analytics & Reporting** connect training activity to measurable business outcomes.
- **Nano & Microlearning**, including SPARK nano-learning, deliver bite-sized lessons that fit into daily schedules and allow teams to apply knowledge instantly.
- **AI-Powered Chatbot for Search & Guidance** helps employees find answers fast, connect with the right content, and solve problems without breaking project momentum.

BUILD SKILLS. APPLY FAST. DELIVER RESULTS

With Pinnacle Series, applied learning isn't a feature - it's the foundation. Every piece of content, workflow, and integration is designed to turn knowledge into project-ready capability.
